EDUCATION

United International University, Dhaka — B. SC.
in CSE

Dhaka Imperial College, Dhaka — H S C

KEY RESPONSIBILITIES:

Project Leadership:

- Leading teams to deliver new features on time.
- Orchestrating sub-tasks and ensuring timely completion by team members.
- Participating in cross-team collaboration and discussions for schema definition.

Technical Development:

- Developing and implementing solutions using a variety of technologies and frameworks.
- Utilizing Microservice Architecture for multiple projects.
- Have experience managing servers. Also, I have experience building servers and manage

Front-end Development:

- **HTML/CSS:** Creating and styling the user interface to ensure a visually appealing and responsive design.
- **JavaScript/TypeScript/Dart:** Implementing interactive features, handling user input, and managing the client-side logic.
- **Vue Js/Nuxt Js/Flutter:** Frameworks for building robust and efficient front-end applications.
- **User Experience (UX) Design:** Ensuring a positive and intuitive user experience.

Back-end Development:

- **PHP:** Server-side scripting language commonly used for web development.
- **Laravel/Lumen:** PHP frameworks for building scalable and maintainable back-end systems.
- **Node.js:** JavaScript runtime for server-side development, providing a non-blocking, event-driven architecture.
- **Database Management:** Working with both relational databases (RDBMS) and NoSQL databases for data storage and retrieval.
- **Microservices Architecture:** Designing and implementing modular and scalable architectures for applications.
- **Server-side Logic:** Implementing business logic, authentication, and authorization on the server side.

Database Management:

- **RDBMS (e.g., MySQL):** Structuring and managing relational databases to store and retrieve data.
- **NoSQL (e.g., MongoDB, Redis):** Working with non-relational databases for specific use cases like caching and real-time data.

Mobile App Development:

- **Flutter:** Creating cross-platform mobile applications using the Dart programming language.

Version Control:

- **Git:** Manage source code changes, collaborate with team members, and ensure code versioning.

Containerization and Orchestration:

- **Docker:** Packaging applications and their dependencies into containers for consistent deployment.
- **Kubernetes:** Orchestrating and managing containerized applications in a scalable and automated way.

DevOps:

- Hands-on experience managing cloud servers and building a server infrastructure for company projects.
- Proficient in handling development and operations aspects of the software development lifecycle.
- Demonstrated ability to set up, configure, and maintain cloud servers independently.

Remote Work Experience:

Adapting to and effectively working in remote work environments, indicating strong communication and collaboration skills.

ACHIEVEMENTS

- Successfully led teams to deliver streamlined solutions, meeting project deadlines and ensuring high-quality deliverables.
- Orchestrated sub-tasks, optimizing team performance and achieving timely completion of development milestones.
- Demonstrated proficiency in Microservice Architecture, enhancing system scalability and modularity.
- Effectively managed cloud servers, ensuring server stability and reliability for company projects.
- Collaborated in cross-team discussions, contributing to schema definitions and promoting cohesive development practices.

SOFT SKILLS

- **Effective Communication:** Demonstrated strong communication skills through cross-team collaboration, discussions, and coordination with government officials.
- **Team Collaboration:** Proven ability to lead and collaborate with cross-functional teams, orchestrating sub-tasks for timely project completion.
- **Problem Solving:** Adept at identifying and resolving challenges, ensuring smooth project progress and high-quality deliverables.
- **Adaptability:** Successfully adapted to remote work environments, showcasing flexibility and efficiency in different work settings.
- **Leadership:** Led teams to deliver new features on time, fostering a collaborative and productive work environment.
